

Gustafson G-0[®]

Pressed Fittings

- ★ *Yellow label, Union-made product*
- ★ *Consistent workmanship*
- ★ *Lower HVAC system operating costs*
- ★ *Dependable quality*
- ★ *Plug and play with in-house spiral*

This is what makes us different...

- Available in a wide range of sizes fittings
- Rolled edges on fittings add strength and reduce risk of injury
- May be installed in all weather conditions
- Adjustability – fittings can be rotated 360° during installation
- Manufactured to strict published manufacturing tolerances
- Proud partner of the Sheet Metal Worker's International Association (SMWIA)
- Green – no VOC off gassing
- Fast and easy installation

Discover Gustafson's Duct Mounted Registers

The DMR is a supply/return register with adjustable double deflection blades and a volume damper designed specifically for direct mounting on a spiral duct. The use of rectangular register taps are not required.

The register is designed in such a way that the flanges always meet flush to the duct regardless of the duct diameter. It also comes equipped with end caps and a gasketing material installed around the neck of the register.

This prevents air leakage. DMR is manufactured from galvanized sheet steel and is assembled without the use of welding. This allows the register to be used without further surface treatment and gives it the same finish as the duct.
