

Curved register

CREG

Description

The CREG is a supply/return register with a curved face

- adjustable double deflection blades
- allows for 4-way airflow and half length screwdriver operated volume adjusting scoop
- duct diameter must be 4" larger than height (H) of diffuser.
- performance data available on request

Materials and finish

Galvanized sheet steel (standard).
Custom finishes are available. Call for details.

Order Example

Gustafson Nongasketed
CREG - W x H - Duct Diameter - Material - Finish

Register nom. size W x H (in)	Min. duct diameter (in)	Free area (ft ²)	Duct opening W X H (in)	Weight (lbs)
12 x 4	8	0.231	12 x 4	1.8
14 x 4	8	0.271	14 x 4	2.1
12 x 6	10	0.362	12 x 6	2.5
14 x 6	10	0.425	14 x 6	2.9
16 x 6	10	0.488	16 x 6	3.3

Performance notes:

- 1.) Performance data calculated with blades set at 0°.
- 2.) Engineering based off nominal face dimension.
- 3.) Throw values are measured in feet for terminal velocities of 150/100/50 FPM.
- 4.) Throw data is based on supply air and room air both at isothermal conditions.
- 5.) Effective core areas listed in chart are defined as the measurement of space between the blades actually utilized by the air.
- 6.) Data obtained from tests conducted in accordance with ANSI/ASHRAE standard 70-2006.
